

Adoption Services - are provided to Kandiyohi County children waiting for adoption. The adoption worker works diligently to locate permanent homes for the children and facilitate the adoptive process in a timely manner. The social worker also provides services to families who have adopted children in the past. These may include biological family searches, obtaining valid information regarding the bio-family, or connecting the adoptive family with assistance programs as necessary. For more information regarding adopting Minnesota's waiting children go to Minnesota Adoption Resource Network at www.mnadopt.org.
